

Covid-19 Prevention Plan

Here at American Lawn Irrigation we are taking the safety of our clients and employees very seriously. During this period of balancing exposure to contamination and providing great service, we have implemented some new procedures to combat these issues.

First and foremost, our team members that visit your property, have all been provided a list of the symptoms from the CDC. They have also been provided personal thermometers and instructed to test daily prior to arriving at our premises. There is as a zero tolerance for showing up with any sign of any illness, and no return to work without a doctor's note. They have also been provided extra protective equipment IE: latex gloves, boot covers, antibacterial hand towels and education on proper hygiene.

Secondly, our trucks and equipment have been disinfected, as well as a disinfectant plan in place for vehicles and equipment. These items receive disinfectant solution applied multiple times daily to vehicle surfaces, tools and machines. This goes along with our property where they start their day. Our premises have been constantly treated multiple times daily. Desks, doors, bathrooms etc. are all treated aggressively following CDC guidelines.

Lastly, we have implemented social distancing rules in effect in the field and at the shop premises. We have two separate buildings for our technicians/crew and office staff to cut exposure in half here. We have also limited the outside world from entering our premises except for essential deliveries. Paper has all but been eliminated as to not have the back and forth exchange. Crews run schedules off an electronic device and run thru the cloud. Also please expect to see our crews keeping their distance from site contacts allowing space between persons, along with no customary social greeting such as handshakes.

We would also like to ask for your cooperation in these efforts. If anyone on your site has had any cause for concern regarding the Covid-19 virus, please notify us immediately and we will postpone service to a later date. Thanks in advance for your cooperation as we look forward to providing quality service to you this
